COMMUNITY MUSIC CLUB PRESENTS FINE PROGRAM

CANTATA PRESENTED TO LARGE AND APPRECI- ATIVE AUDIENCE

The annual program of the Community Music Club was presented last Thursday evening as one of the numbers of the General Lectures Series. A fair-sized audience, noticeably lacking in student representation, witnessed the performance of "The Erl-King's Daughter," a cantata founded upon ancient Danish legends.

Because of the rather vigorous action of the plot, the whole production was given "out of costume." However, members of the club acted as readers, carrying the story along between the musical numbers and enabling the audience to follow the singing.

Aside from one or two "weak spots", the cantata was very beautifully rendered. The principal solo roles, those of Sir Oluf and his mother, were capably sung by Mr. F. C. Farnham (Rolla's Caruso, to borrow Dr. Mann's phrase) and Mrs. Harry Trowbridge. The numbers by the chorus were thoroughly enjoyable, particularly the "Morning Hymn."

At the close of the program,

Glee Club Well Received In S. T. C. Concert

ENTERTAINED BY FORMAL DANCE ON LAST OUT-OF- TOWN TRIP

The M. S. M. Glee Club in their last trip of this year went to Springfield to sing at the Teachers' College where they were well received. All the Miners were the guests of the Springfield Girls' Glee Club at a dance given in the Teachers' College gym Tuesday night. It was a Leap Year dance and very successful as far as the Miners were concerned. On the following morning the Glee Club gave their concert in the Teachers' auditorium before a very large crowd composed mainly of students of the school there. The concert was a very excellent one and numerous encores were necessary to finally satisfy the crowd. This leaves but one more appearance, which is on Baccalaureate Sunday, for the Glee Club this year. The Club has had a very successful season under the very able direction of Mr. James Cullison.

NOTICE

In accordance with the Constitution of the Athletic Association, the following proposed amendments are hereby submitted to the members of the Athletic Association for inspection, and are to be voted upon April 16, 1932. Instructions as to the manner of voting shall be posted at the polls.

"Any student who has been a regular member of the tennis team, may upon the recommendation of the coach and with the approval of the Board of Control be entitled to wear the insignia of the school. The style and design of this insignia shall be a block "M" of old gold color, 6" x 6" x 1 1/4", with a 3" gray, centrality located "T" to symbolize tennis."

If you think tennis should be recognized on this campus, vote for the proposed amendment.

PROSPECTORS, IND. A'S LEAD INTRA-MURAL BASEBALL LEAGUE

LAMBDA CHI'S IN SECOND PLACE WITH NO GAMES LOST

Several more games were played in the intramural baseball league last week.

On Monday, April 4, the Ind. A. team, with Breuer pitching a no-hit, no-run game, triumphed over the Bonanza team, 3 to 0. Batteries: Ind. A.—Breuer and Heitzman; Bonanza—Tomlinson and Parker.

The Kappa Sigs won from the Kappa Alphas, 6 to 4. Batteries: Kappa Sigma—Parker and Mashmiller; Kappa Alpha—Rydstrom and Wilhite.

On Thursday the Lambda Chi team swamped the Sigma Nus, 22 to 6. Fort held the Sigma Nu team to six hits, while his own team collected a total of twenty-two safeties. Batteries: Lambda Chi—Fort and Macke; Sigma Nu—McKinley and McCreight.

The Prospectors won their third

Faculty Amends Intra- Mural Eligibility Rule

At a recent meeting of the faculty, it was decided to permit students on probation to compete in intramural athletics. Heretofore students on probation have been barred from athletics.

This plan will enable all students to enter into competition for their particular organization.

NOTICE

In accordance with the Constitution of the Athletic Association, the following proposed amendments are hereby submitted to the members of the Athletic Association for inspection, and are to be voted upon April 16, 1932. Instructions as to the manner of voting shall be posted at the polls.

1. Any student who has been a regular member of the swimming squad may, upon the recommendation of the coach and with the approval of the Board of Control, be entitled to wear the school insignia. The style and design of this insignia shall be a block "M" of old gold color 6" x 6" x 1 1/4".

2. Any student who has been a regular member of the swimming team may upon the recommendation of the coach and the approval of the Board of Control, be entitled to wear the school insignia. The style and design of this insignia shall be a block "M" of old gold color 6" x 6" x 1 1/4" with a 3" gray, centrality located "S" to symbolize swimming.

The difference between the proposed amendments 1 and 2 is the type of letter to be awarded. If amendment 1 is adopted swimming will be classified with such sports as basketball, baseball and track, whereas if amendment 2 is adopted swimming will be classified with such sports as wrestling and boxing.

INDEPENDENT 'A'S' WIN INTRA-MURAL TRACK MEET.

EVERETT, INDEPENDENT "A", HIGH POINT MAN

Fine Cooperation And Talent Displayed

With ideal weather conditions prevailing, the intramural track and field meet was run off last Saturday, April 9. The Ind. A's won the meet with 34 1-3 points. The Pi K. A.'s were second with 22 points. There was close competition in all events, with fairly fast time being made on the track and good distances in the field events. The meet, under the direction of Coaches Grant and Brown was run off in grand style. The announcing was taken care of by that most capable announcer, Chick Moreland. The following is the team scores:

Independent "A"..... 34 1-3

GLEE CLUB AND PLAYERS PRESENT MINSTREL THIS WEEK

MINSTREL FRIDAY AND SATURDAY NIGHTS. DANCE FOLLOWING FRIDAY NIGHT PERFORMANCE.

Friday and Saturday nights the M. S. M. Players and Glee Club are putting on the Tennessee Minstrel at Parker Hall. The performances begin at 8 o'clock and the Friday night performance will be followed immediately by a dance at the gym sponsored by the same two organizations.

The Minstrel is made up of brilliant, laugh-getting repartee by the nigger end men and the interlocutor. It is a very modern production and full of smart, side-splitting cracks and humorous situations which the end men are in. Then with this is the music. It is full of very snappy, light and beautiful music sung by soloists and chorus. Added to this outlay of wonderful entertainment is a short one act blackface play that comes between the first and second part of the Minstrel.

Tickets can be obtained from members of either organization mentioned above and sell for the price of 35 cents each. For the dance, any couple showing two Minstrel tickets or stubs will be admitted for 75 cents while all others will be admitted for one dollar.

Senior Chemists On Inspection Tour

VISIT MANY INTERESTING CHEMICAL PLANTS

On last Monday morning several carloads of seniors in Chemical Engineering, left on their senior trip to visit several types of industries in which chemical engineers are employed.

Under the direction of Prof. Dunlap, these men met other senior chemists who had journeyed to St. Louis the preceding Saturday. Considerable difficulty was encountered in keeping the schedule of events that had been planned in operation: many of the factories and plants that the seniors intended to visit were closed down and they were unable to go through them. However, very suitable substitutes were obtained so that the trip lost nothing of its

Letters For Tennis

To an observing eye it is apparent that the followers of tennis on our campus are deserving of some award. A recent example of the genuine interest taken in tennis this year is the re-vamping of the two courts in front of Parker Hall. Anyone who watched the proceedings knows that considerable time and energy was spent by those who labored to put the courts in shape. And it doesn't take a man with an eye for beauty to see that the campus about Parker Hall looks much better now than it did a while ago. There is a smooth stretch of nicely kept clay now instead of run-down courts. The two courts near the athletic field are also in process of reconstruction, and they give promise of being much better courts than they were last year.

Although there is no regular practice session for the tennis men they nevertheless put in plenty of time in practice. This year they built their own courts. The man who is fortunate enough to be selected on the M. S. M. Tennis Team must have a considerable investment in his favorite sport. He must have a good racket, strung with expensive gut, and he must keep it in that shape; he must purchase new balls frequently. He buys his own tennis clothing and shoes. Is it asking very much to reward such a fellow with a minor sport letter, provided he chalks up a victory for M. S. M.?

The tennis men aren't asking for very much, and they aren't asking to be classed as major sport men. They believe, however, that it is a distinct injustice to provide letters for sports which are now dead as far as the M. S. M. campus is concerned, and provide a minor letter for a sport which is so up and going as is tennis. The letter, if awarded, would be of such a distinctive character as not to be confused with a major letter.

The Athletic Department is co-operating with the tennis men, and things are running along smoothly. The tennis schedule so far consists of four meets with other colleges, not including the conference meet at Columbia. We are asking the students at this school to give

us their sanction by turning out and voting in favor of tennis letters. The amendment requires a majority vote of the student body in its favor for ratification. The tennis men will greatly appreciate a heavy vote. How about every student taking it upon himself to go to the polls and cast his vote? You won't hurt M. S. M. by granting the tennis team letters.

Thru The Transit

It looks as though ye ed (Edward to you) is trying to make this into a high hat sheet. I noticed that he is even running a puzzle in it this week. The puzzle has something to do with six men on a train and is one of those things that they give to Tau Betas when apply for a position (not a job). Well, he can't get away with that. We will also submit our pet brain teaser for the public to ponder over. And to go the old boy one better, we will donate an excellent paper mache transit. Get out your brains (or if your notebook isn't handy use a slip-stick) and solve this one. There are six men on a train going from Rolla to New York. We don't know why anyone should want to leave Rolla for a small time burg like New York, but that's the way the lousy puzzle goes. Anyway, the crew of three men were named Zilch, Zilch and Zilch. There were also three passengers on the train named Zilch, Zilch and Zilch. The engineer lives in St. Louis and the other five men live in St. Louis. The problem is to find out why the engineer wears red flannels. Get busy on this and send your answers to this great literary organ in care of the Zilch puzzle editor.

The freshmen in this school are really getting smart. In one course the prof has a habit of walking about the room during a quiz. One wise freshman laid his watch, with the face up, on his desk. The prof, on noticing it, decided that he was cribbing and so he slipped around behind him and looked at the face of the watch. Imagine his embarrassment when he noticed that a slip of paper pasted to the crystal carried the words, "Nerts to you, prof."

What a party the interfraternity council threw last week-end. It looked as though everyone in school was there. We were surprised to see Jenkins there as it was a free dance. We have heard that, in spite of that fact, he climbed in through the window out of force of habit. (Ye Ed's Note: We ran that last year but its still good.) And then there's Bermi, who on being told that there was a gym dance that night, said that he had some studying to do but might come up later and crash it.

It really was a surprise to find out how many track stars there are in this school. And the graceful form displayed by the entrants in the high hurdles and pole vault was something well worth

seeing.

Spring is in the air and the season of spring fever is nigh at hand. At this time of the year we always wish we were civils or someone else that doesn't have to work. It's easy to see why the boys change from a course like chemical to civil. When spring begins the civil gets his board or whatever it is and goes out in the shade somewhere and pretends to work. We believe the subject should be investigated. Those plane tables would make a swell place to play bridge. It has even been reported that Towse and Trotter carry a deck of cards with them on these trips. But then nobody could expect them to work anyhow.

When one of Dr. Grawes intelligent mineralogists asked him to describe a froth, he was advised to join a certain well known organization and see what beer foam resembled. Imagine a Miner not knowing what beer looks like. And as the old man said to his son, "Now, son, if papa catches you sailing boats in his beer again he's gonna knock your d— block off."

—MSM—

HOW SMART ARE YOU?

The following test is used by the Bethlehem Steel Company, with 2½ hours allowed for its solution. No catch to it. If you are exceptionally bright you can do it in five or ten minutes.

The Problem

A train is operated by three men—Smith, Robinson and Jones. They are fireman, engineer and brakeman, but not respectively. On the same train are three business men of the same names, Mr. Smith, Mr. Robinson and Mr. Jones. Consider the following data about all concerned. 1. Mr. Robinson lives in Detroit.

2. The brakeman lives half way between Chicago and Detroit.

3. Mr. Jones earns exactly \$2000 per year.

Smith beat the fireman at billiards.

5. The brakeman's next door neighbor, one of the passengers, earns 3 times as much as the brakeman who earns \$1000.

6. The passenger whose name is the same as the brakeman's lives in Chicago.

Who is the engineer?

If we can find a solution it will appear in the next issue.

—MSM—

BLIND GOLFERS

Dr. Coleman R. Griffith, of Urbana, Ill., athletic research specialist at University of Illinois, says that psychologically a golf player need not use his eyes at all to swing a wooden club. He has taken two groups of men who have never swung a club and blindfolded one group. The men in the group which he blindfolded have developed better swings and better stance than the ones using their eyes.

We have noted lots of players Continued on page six

MINER TRACKSTERS

Next week-end the Miner track squad, under the direction of Coach Grant, will travel to Fulton, where they will participate in a tri-angular meet. The other two entries will be Westminster and Central of Fayette. A meet between these three schools was held last year and in it the Westminster squad was victorious while the Central aggregation took a second place. According to Coach Grant the Miners stand a very good chance in this coming meet. Much new material and men who are already seasoned give the Miner squad a better chance to place in this meet than they had in the meet last year. As yet many of the men on the Miner squad have not been tried under fast competition, but the speed they have shown in trial runs makes the out-look on the track season seem quite bright. Through the loss of Boyd, West-

minster's chances for a walk-away in this meet have been materially lessened. However, the rest of their squad is practically the same as last year and they are conceded an edge over the other schools entered in this meet.

The Miner squad held their try-outs during events in the intramural track meet that was held April 9. In these try-outs Monroe ran a half in 2:04, Irwin showed his heels to run the quarter in :53, and Howerton put one foot in front of the other fast enough to do the 220 in 23.2. Nickel will no doubt be entered in the 100-yard dash. His best time as yet is 10.5. Weigel, who ran his best flight of low hurdles Saturday was timed at 8.7. In the field events the Miners will probably be represented by Towse, who throws the javelin in the neighborhood of 170 feet without much effort, and Jenkins and Vogel, both of whom are tossing

the discus close to 120 feet.

**MEASURING THE STRESSES
IN A COILED SPRING**

Heavy coiled springs, like those under railroad cars, often break, although they have been built according to accepted design standards and formulas. Such failures

caused A. M. Wahl, a Westinghouse research engineer, to make some unusual tests. He found the actual shearing stress in a spring was very much greater than that accepted by engineers.

He also found that stresses inside the spring are often two and Continued on page six

SHE WANTED A MILLIONAIRE

Joan Bennett, beautiful daughter of a railroad brakeman, meets Spencer Tracy, an engineer on the railroad, and they fall in love. But Joan has already made up her mind to marry nothing less than a millionaire. Spencer secretly enters her in a beauty contest which she wins. She then wins the national contest, and marries one of the judges, who incidentally, is a millionaire. In Paris, she has all the clothes and everything she wants, including a husband she doesn't want. But after quite a few scenes and much action, the picture ends happily. Spencer Tracy does some real acting in this picture, and is rapidly coming in the front in Hollywood.

RACING YOUTH

Starring Slim Summerville and June Clyde, "Racing Youth," a picture of the automobile industry, promises to be good entertainment. When June inherits the Lion Automobile Factory, she doesn't know just what to do with it. On her first visit to the factory, her aunt is mistaken for the owner; June, seeing no harm in the mistake, encourages it. The general manager schemes to sell the factory to its competitor. By fast action on the part of Frank Albertson, the hero, the factory is saved. The picture contains lots of racing thrills, smash-ups, and races with motorcycle cops. Slim Summerville supplies the humor.

WORKING GIRLS

What happens to small-town girls that seek their fortune in the big city? We've seen lots of solutions, but never one like "Working Girls." When Buddy Rogers and Paul Lukas are in love with the same girl, anything can happen. Dorothy Hall and Judith Wood are the working girls. Because Dorothy is good-looking, she gets a job as Paul Lukas' secretary. Judith gets a job at a telegraph desk, where she meets Buddy Rogers and Stuart Erwin. Lukas is in love with Dorothy when she meets Buddy Rogers and falls for his smooth line. What a mix up that makes. Through Judith's cleverness, the triangle is solved.

STEPPING SISTERS

When Louise Dresser, Minna Gombell and Jobyna Howland get together, they form the funniest thing on six legs, a trio of laughter. They tried to make the "600", but all they know about caste, they learned in a burlesque show. The social ladder was too steep even for these high steppers.

ARSENE LUPIN

John and Lionel Barrymore are together for the first time, John playing the part of the thief, and Lionel playing the part of the chief of detectives. The picture is based on a Paris stage success. It depicts the entertaining career of a debonair master thief who is trailed by an implacable detective through the gal salons of Paris. John, as Arsene Lupin, has been

terrorizing Paris for some time. Lionel has been given one week more to capture the thief, or he loses his job. A feminine police spy Lionel has engaged to betray Arsene Lupin, turns about face and falls in love with him, preferring the prison to betrayal of her lover. This picture, besides being the only picture with both the Barrymore brothers in it, is probably the first mystery-thriller to have a sense of humor.

Senior Chemists On Inspection Tour

Continued from page one

value.

The first concern to be visited was the Anheuser Busch Corn Sugar Plant. On Monday afternoon the Laclede Gas Light Company was gone through. Tuesday morning the chemists visited the Monsanto Chemical Works at Monsanto, Ill., and in the afternoon the Cahokia Power Plant in place of the Union Starch and Refining Company. Wednesday was spent in inspecting refineries: the White Star Company at Wood River in the morning, and the Standard Oil Company at the same town in the afternoon. The International Shoe Company's Tannery was visited on Thursday morning, and the Owens Illinois Glass Company in the afternoon. On the last day of the trip, Friday, the seniors went to the Mallinckrodt Chemical Works and the Proctor and Gamble Soap Plant.

Those of the eighteen men making the trip who did not live in St. Louis, stayed at the Claridge Hotel. From all reports the chemists had a typical Miner outing while in St. Louis. With the cares of the day over by nightfall, they made the rounds of those places of amusement which appeal to a Miner's heart, and it may be said that they had an excellent guide.

NOTICE

To the Faculty
Missouri School of Mines and Metallurgy
Rolla, Missouri
Gentlemen:

Your Committee on Credits and Schedules recommends that paragraph 2 of Rule V concerning permissible schedules be changed to provide that permissible schedules be determined by the student's total average grade to date up to the time of pre-registration instead of being based upon his average grade for the preceding semester as it is at present.

This change is recommended in order to make it possible for advisers to know at the time of pre-registration the amount of work a student will be permitted to schedule for the ensuing semester, and because the total average to date is a much more significant figure than an average for only one semester.

Respectfully submitted,
COMMITTEE ON CREDITS AND SCHEDULES.

INTER-FRATERNITY COUNCIL DANCE

On last Saturday evening one of the greatly anticipated social events of the spring took place,

the annual dance given by the Interfraternity Council. The council is composed of one representative from each fraternity and club on the campus. It is the duty of the council to aid these clubs in making and keeping harmonious relations both among themselves and also with the two Independent groups. In this the council has succeeded admirably thus far.

It also falls to the council to set and apportion dance dates. The annual free dance which they give each spring, and to which the entire student body is urged to attend, is one of their endeavors to promote better relationships between the various campus organizations.

The first dance was given last year, as the council was organized in the fall of 1931. Their first dance was an experiment, more or less, but it was such a success that the plan of giving one each year was decided upon.

The dance of this year even surpassed their initial one of the previous year. The school and town girls turned out in full force and an enjoyable evening was spent dancing to the excellent music furnished by Babe Clemmon's Varsity Orchestra. It was the first time this year, with the exception of St. Pats, that the school has gathered on a social basis. The council intends to continue their present policy of having the dance every year and they deserve quite a bit of credit for the way in which it was conducted.

The chaperons for the occasion were: Dr. and Mrs. Schrenk, and Prof. and Mrs. Carlton.

here who appear to be blindfolded on both woods and irons.

We wonder if blindfolding would help our wicked slice. At least it would postpone the swearing until we could get the blindfold off to see into which rough the ball had gone.

one-half times as great as those on the outside where measurements had always been taken. With these new facts it was a simple matter to design and make springs of the proper cross section and strength to eliminate breakage under the required loads.
